

NIKOLA STOYANOV

LOCOMOTIVE OPERATOR | CNC PROGRAMMING & DIGITAL PROJECTS

 necrotixlab.com

 nikolastoyanov96@gmail.com

 Sliven, Bulgaria

Locomotive operator with previous experience in CNC programming and machining using Siemens controls. Skilled in interpreting technical drawings, setting up equipment, and following safety procedures. Alongside my industrial career, I work on independent projects involving WordPress websites, digital design, content publishing, and online community management.

EXPERIENCE

LK32 OPERATOR
Mini Maritsa-Iztok EAD | 2022 – Present

- Operate LK32 electric locomotives for coal transport and unloading operations.
- Monitor equipment condition and respond to operational irregularities.
- Follow industrial railway safety procedures during daily operations.

LOCOMOTIVE OPERATOR
BDZ Cargo EOOD, Burgas | 2019 – 2022

- Operated Class 43, 44, 46 locomotives across 150+ cargo routes annually ensuring timely delivery.
- Performed pre-operation and post-operation technical inspections.
- Interpreted electrical and mechanical schematics.

CNC OPERATOR AND PROGRAMMER
KAMT AD | 2016 – 2018

- Programmed CNC machines independently from technical drawings, achieving a 97% accuracy rate in production runs.
- Set up and operated CNC equipment using Siemens controls, maintaining a production schedule for 15+ parts daily.
- Processed metal components on lathes, milling, and drilling machines, delivering quality parts for 50+ distinct projects monthly.
- Operated plasma cutting equipment and hydraulic presses, producing 200+ precision parts per month with minimal defects.
- Collaborated with quality assurance teams to reduce rework and enhance CNC machining efficiency by 12%.

Independent Projects

Nikola Stoyanov

NecrotixLab | Personal Website & Digital Projects

- Manage a personal website presenting professional experience, creative work, technical projects, and published articles.
- Define requirements and test features for a custom CMS, including content management, media galleries, project pages, and administrative tools.
- Refine navigation, page layouts, and responsive interfaces to improve usability across desktop and mobile devices.
- Use AI-assisted workflows to support development, troubleshoot issues, and validate website updates.
- Create and edit visual assets and written content for the website.

BG-GAMER | WordPress Website & Discord Community

- Manage a gaming community with over 2,800 Discord members and maintain its accompanying WordPress website.
- Configure and develop Custom WordPress themes, plugins, and content publishing workflows.
- Organise Discord channels, roles, permissions, and moderation tools.
- Configure and maintain bot integrations for community management and automated features.
- Manage hosting settings through N0C/cPanel and troubleshoot website configuration and functionality issues.

Mirko Build Stroy | Local Business Website

Website project | 2026 | In development

- Plan a website presenting memorial stonework, engraving, installation, restoration, and maintenance services.
- Define the site structure, service pages, and a product catalogue to help customers explore available options.
- Specify enquiry features, including a contact form and Viber integration, alongside Google Reviews and local SEO requirements.

MMI WorkShift | Employee Scheduling System

Independent project | 2026 | In development

- Define requirements for an unofficial scheduling system for employees at Mini Maritsa Iztok 2.
 - Structure Excel schedule imports and personal monthly calendars covering day shifts, night shifts, leave, sick leave, and rest days.
 - Plan administrative workflows for schedule previews, corrections, employee records, and role-based access.
 - Use AI-assisted development and testing workflows to support implementation.
-
